To Whom It May Concern:

I have known Keith Meyer on a professional basis since about 2005 when a family member listed a property for sale with him. He successfully sold that property and I engaged him in a search for commercial income property for my use. In all of my dealings with him he has been responsive and thorough in communications, in property searches, in business matters and in closings. He always returns phone calls and answers any inquiries I might have regarding the business proposition of any property he presents. His researches and understands the details of any property that he presents and his knowledge of finance and business is helpful. I have never doubted that he was acting in my best interest at all times.

In searching for income property for me he presented properties from public listing services as well as properties that were exclusive to his company. He is current on most real estate activity in New Mexico and I feel that I saw the best deals that were available.

I know Keith Meyer to be an honest and hard working professional. I would use his services again and I would highly recommend him to anyone who is selling or buying commercial real estate.

A handwritten signature in black ink that reads "James P. Baca". The signature is fluid and cursive, with a long horizontal stroke at the end.

James P. Baca
